Ship it AOG Signs Agreement To Be Exclusive Distributor For Business Jet Wheel Pressure Gauges and Relief Valves

NBAA, Atlanta, GA—**Ship it AOG**, the Addison, Texas-based distributor of business aviation spare parts, has signed an agreement with Circle Seal Controls, Inc. to be the exclusive distributor of the company's line of business jet aircraft wheel pressure gauges and relief valves. Under terms of the contract, **Ship it AOG** will maintain a significant inventory of the gauges and valves in order to provide rapid response for business jet operators.

"Dramatic increases in the incidence of operators 'tankering' fuel to lower operating costs have resulted in aircraft taking off with elevated operating weights, making the maintenance of correct tire pressures extremely important. These gauges and relief valves are critical to monitoring and maintaining those levels and to the safe and reliable operation of those aircraft," noted George Miller III, president of **Ship it AOG**. "We're very pleased to have established this partnership with Circle Seal Controls. In addition to distributing these items, we will be collaborating with Circle Seal to develop pressure gauges for a variety of different business jet applications. Since they also produce and distribute a wide range of highly-regarded components and systems for both the commercial and defense aerospace markets, we look forward to identifying additional opportunities to work together. To operators, flight departments and end users of the corporate business jet sector, **Ship It AOG** is the provider of choice for quality aircraft

parts and support equipment that gets aircraft from AOG to airborne because our customers' time is of the essence," he added.

Based in Addison, TX, **Ship it AOG** (www.shipitaogllc.com) was established in 2000 and has quickly grown into a leading international distributor of spare parts for the business aviation sector. **Ship it AOG** offers customers detailed technical expertise and maintains a complete library of technical documentation on-site. True to its name, **Ship it AOG** prides itself on prompt and efficient service to customers worldwide.

Circle Seal Controls is a CIRCOR Aerospace company located in Corona, California. It designs, develops and manufactures special fluidic control component systems and is also a provider of a full range of check, relief, motor or solenoid operated, hand, regulator and manifold systems.
